PROFILE

Supply Chain Operations, Inventory Control, and ERP Support Specialist with 4 years of full-time experience at Maersk Contract Logistics, currently completing a Bachelor in Management (Bac+3, Supply Chain Management track) at Rennes School of Business. Extensive hands-on expertise in Oracle ERP data management, PO/ASN reconciliation, inbound planning, stock allocation & inventory management, multimodal cross-border transport (Sea & Road), and customs compliance. Seeking a 4-to-6-month Internship (starting January 2027) and/or a 24-month Master's Alternance (Bac+4/Bac+5) in Supply Planning, Inventory & Stock Management, Transport Import/Export, or ERP Analysis.

WORK EXPERIENCE

Operations Specialist - Supply Chain & ERP Support — ***Maersk Contract Logistics (Guangdong) Co., Ltd.***
Supply Planning, Inventory Control, ERP Support & Cross-Border Logistics — *09.2022 - 08.2026 (4 Years)*

ERP Data Management, Inventory Control & Process Optimization

- Executed daily data validation and reconciliation across Oracle ERP, EDI feeds, and client Packing Lists for Purchase Orders (PO) and Advanced Shipping Notices (ASN), ensuring accurate downstream inventory allocation and stock availability.
- Built Excel PivotTable and VLOOKUP/XLOOKUP validation workflows to detect duplicate EDI timestamps and resolve multi-PO/ASN mapping errors, eliminating repetitive manual verification tasks.
- Investigated systemic EDI transmission exceptions and established master data sanity-check standards (verifying unit weight benchmarks of 20g-40g and material compositions) to prevent customs and operational holds.

Supply Planning, Multimodal Transport & Retail Stock Replenishment

- Managed end-to-end cross-border inbound planning between Hong Kong and Shenzhen bonded zones across Sea Freight (FCL) and Road (FTL/LTL), scheduling port container pick-ups within free-storage windows to avoid demurrage charges.
- Developed a cost-driven shipment consolidation rule based on volume thresholds (triggering direct truck dispatch for priority cargo >30 CBM while consolidating smaller ~6 CBM batches) to optimize transport cost efficiency.
- Coordinated retail store-to-store inventory transfers, stock replenishment, and reverse logistics (consolidating slow-moving stock and display fixtures/POSM for return to the central warehouse) to maximize space utilization.

Customs Compliance, Exception Resolution & Cross-Functional Coordination

- Compiled, translated, and audited complete customs clearance documentation (Packing Lists, Invoices, Contracts, Bookings, Brand Authorizations, Certificates of Origin) and validated HS Code classifications for merchandise and non-merchandise items.
- Acted as the central daily liaison among warehouses, ocean/road carriers, customs brokers, and brand clients to resolve operational bottlenecks, investigate weight discrepancies, manage cargo claims, and lead new project onboarding; awarded the Maersk SPOT Award.

EDUCATION

Rennes School of Business (Rennes, France) — ***09.2026 - 09.2027***
Bachelor in Management (Track in Supply Chain Management - Bac+3) | Eligible for 24-month Master's Alternance (Bac+4/Bac+5)

Law and Business College of Hubei University of Economics (Wuhan, China) — ***09.2019 - 06.2022***
